B.A. I Home Science	Paper –I Human Development	CO 1 To understand problem of various age group. CO 2 To create harmonious relationships among all people.
	Paper–II Foods and Nutrition	CO 1 To maintain health of family as well as community . CO 2 To avoid deficiency diseases CO 3 Identify and explain nutrients in foods and the specific function in maintaining health . CO 4 Apply food science knowledge to describe functions of ingredients in food.
	Paper –III Basic of textile – I (Practical)	CO 1 By using the practical knowledge of textiles, student can be economically independent. CO 2 Student can start their own boutique.
	Paper –IV Textile (Textile and clothing)	CO 1 Students get expertise in the basics of tailoring as well as cloth printing. CO 2 Student as per practical knowledge can start their own business in cloth printing.
	Paper –V	CO 1 The course will be helpful to the student in managing basic knowledge their homes in the future.

	<p align="center">Home Management (Introduction to Home Management)</p>	<p>CO 2 Student can use the knowledge in home decoration CO 3 Student can get job as a interior decorator in future.</p>
	<p align="center">Paper –VI Basics of Textile –II (Practical)</p>	<p>CO 1 Student can start their own boutique. CO 2 By using the practical knowledge of textiles, student can be economically independent.</p>

<p align="center">B.A. II Home Science</p>	<p align="center">Paper –VII Human Development</p>	<p>CO 1 To Sensitize the student regarding each are group so as to develop harmonious relationship CO 2 To make student be understand the human life Cycle</p>
	<p align="center">Paper –VII Human Development</p>	<p>CO 1 Students get acquainted with the knowledge of meal management CO 2 To utilize the knowledge of meal planning.</p>
	<p align="center">Paper –IX Home Management –I (Practical)</p>	<p>CO 1 By using practical knowledge of Home Management Student can decorate their own home. CO 2 Knowledge of Home Management Will develop entrepreneurship skill among students.</p>
	<p align="center">Paper – X Home Management</p>	<p>CO 1 Student will understand various aspect of money management. CO 2 Student will understand the pros and cons of money management. CO 3 Student will be able to take care appliances used in their homes.</p>
	<p align="center">Paper – XI Foods and Nutrition: Food Science</p>	<p>CO 1 To understand the importance of balanced diet in leading healthy life. CO 2 This course will be helpful in dealing with major problem of malnutrition in India.</p>
	<p align="center">Paper – XII Home Management</p>	<p>CO 1 Student will learn various skill regarding interior decoration. CO 2 This course will boost the programme of Skill India</p>

	(Practical)	
SEC- Home Science	SEC –I Sugar Cookery	CO 1 Student can prepare different recipes by using different consistencies of sugar syrup. CO 2 Student can make candy, Toffee, etc at home.
	SEC-II Renovation	CO 1 Student will be able to reuse garments. CO 2 Student will be self sufficient by creating new products through renovation technique

B.A. III Home Science	Paper –XIII Home Science Education and Extension	CO 1 To Disseminate the knowledge of Home Science as well as that of various central and state government schemes to grass root level.
	Paper –XIV Home Management (Family Resource Management)	CO 1 The Knowledge will definitely be helpful to become economically self sufficient.
	Paper –XV Food and Nutrition – I (Practical)	CO 1 To boost the creativity of the student and prepare them to use their skill.
	Paper –XVI Human Development (Human Development and Family Relationships)	CO 1 The knowledge of this subject can spread happiness in students’ life as well as create healthy society.
	Paper –XVII Textile and Laundering	CO 1 This knowledge will be helpful to the students for personal use. CO 2 This knowledge could be a source of income with minimum investment.
	Paper – Food and Nutrition –I (Practical)	CO 1 To boost the creativity of the students and prepare them to use their skills in startup programmes.

SEC- Home Science	SEC-III Jewellery Making	CO 1 To help the student to prepare finished goods or products to be sold.
	SEC-IV Preservation	CO 1 The knowledge of this subject will be helpful to the students to start production in their homes.

Course Outcomes of the Faculty of Commerce and Management

Name of the Course	Paper	Course Outcomes
B.Com I	Fundamental of Financial Accounting	CO 1 To course is to provide the skill of CO 2 Recording CO 3 Maintaining CO 4 And presenting the accounting and financial fact
	Business Statistics and mathematics	CO 1 To provide fundamental knowledge of statistical techniques useful for business analysis. CO 2 To provide foundation of quantitative technique applied in solving business problems.
	Fundamentals of Business Communication	CO 1 To Develop Communication Skills of Students CO 2 To help in personality development CO 3 To improve speaking, writing, and interview skills of students.
	Business Economics-I	CO 1 To acquaint the students with the business economic principles and theories as are applicable in business.
	Computer for Business	CO 1 To develop awareness about computer CO 2 To know the recent advances in the Information technology field CO 3 To develop knowledge about internet, email and social networking
	Tally ERP 9.0	CO 1 To develop awareness about computerized accounting CO 2 To know the recent advances in the computerized accounting CO 3 To develop knowledge about Tally

B.Com II	New Trends Corporate Accounting	CO 1 To understand knowledge of new trends in corporate accounting issue of share and redemption share
	Corporate Law	CO 1 To acquire knowledge and develop understanding of the necessary framework of companies with reference to various provisions or company act-2013
	Principles of Business Management and practice	CO 1 To know to make planning, decision making, controlling, staffing, organizing etc. to understand new approaches in management

	Cost Accounting – I	CO 1 To understand knowledge of cost accounting, single output costing, material cost, labor cost and overhead
	Banking and Finance	CO 1 To study the Indian Banking system, Banking regulation act 1949, Commercial Bank, Development Bank and Digital Bank
	Income tax –I	CO 1 To give knowledge of direct and indirect tax
	Skill E-Commerce	CO 1 To develop the skills to use modern technologies for the business in global world CO 2 To know and develop skills for cyber securities and secure payment gateway for cashless economy CO 3 To know the role of E-commerce in world business Scenario
	Business Law	CO 1 To acquire knowledge about law related to Business
	Risk Management	CO 1 To impart the knowledge to the students about possible risk events, preventions of risks, measurements of risk, management of risk. CO 2 To give insight about risk management and to develop the ability to understand techniques of risk management.
	Advanced Planning in India	CO 1 To study economic planning in India
B.Com III	Advanced Accounting	CO 1 To equip the students with the ability to analysis interpret and use accounting information in managerial decision making and auditing.
	Management Accounting	CO 1 To equip the students with the ability to analysis, interpret and use accounting information in Management accounting information in managerial decision making. The student is expected to have a good working knowledge of the subject. This paper provides the students an understanding of the application of accounting

		techniques for management. Utility: Students can take managerial decisions regarding finance of the business Prerequisite: Basic knowledge of accounting and mathematics.
	Auditing	CO 1 The Objective of the course is to provide the candidates with sound Knowledge of the important provisions of the Audit and company law and their Applications in practices. Utility: Regarding minute study to find out the fraud and errors in accounting Prerequisite: Theoretical and Practical knowledge of accountancy.

	Income Tax Law & Practices-I	CO 1 To provide the candidates with sound knowledge of the important provisions of the Income Tax law and their applications in solving problems on computation of Total Income and Tax Liability.
	Goods and Service Tax-I	CO 1 To provide the candidates with sound Knowledge of the important provisions of the GST Act and their applications in practices.
	Travel and Tourism-I	CO 1 For Study of Travel agents & Tour guide and its application.
M.Com - I	Business Management & Organisational Behaviour	CO 1 The course aims at developing among students an understanding of human behaviours for dealing effectively with behavioural issues at workplace. CO 2 To understand the conceptual framework of Organisational Behaviour.
	Managerial Economics	CO 1 To familiarize with the students the importance of economic approaches in managerial decision making. CO 2 To understand the applications of economic theories in business decisions.
	Statistical Analysis for Business	CO 1 To make students earn the associations of statistical tools and techniques for decision making. CO 2 Help to analysis stoical data for research purpose.
	International Business Environment	CO 1 The purpose of this paper is to enable the students learn nature, scope and structure of International Business. CO 2 Understand the influence of various environmental factors on international business Operations.
	Accounting for	CO 1 To provide the skill of Management techniques, Decision making, Presenting the accounting and sales production fact, Minimize the cost.

	Managerial Decision	<p>CO 2 Student can understand the Management Knowledge, Application of management accounting and skill of decision making in business.</p> <p>CO 3 To provide knowledge of management accounting</p>
	Operations research	<p>CO 1 To acquaint students with the Operation research tools and techniques and their application in management process.</p> <p>CO 2 provide knowledge of research, it will helps to student to make innovation and frame new ideas in day to day life.</p>
	Legal aspects of business	<p>CO 1 To provide the students with practical legal knowledge of general business law issues and topics to help become more informed, sensitive and effective business leaders.</p> <p>CO 2 Provide knowledge of GST, Intellectual Property Rights, the Competition Act, 2002, etc.</p>
	Corporate tax planning and management	<p>CO 1 To make the student conversant with the concept of Corporate Tax Planning and Management and its application in corporate world.</p> <p>CO 2 Provided knowledge of various concept from this subject like Tax Planning in respect of Management Decisions, Advance Tax and Tax Deducted At Source and Advance Tax and Tax Deducted At Source, etc.</p>
M.Com - II	Financial Management	<p>CO 1 This programmed helps student to enable and equip the students with the basic functions and tools of financial management.</p> <p>CO 2 This subject provides knowledge financial activities it will help students to became Financial Manger.</p> <p>CO 3 The students will be able to handle finance function so it will helps to improve organizational activities.</p> <p>CO 4 The knowledge of this subject helps for students how to become Successful Finance Manager.</p> <p>CO 5 The students will become successful Business Person by handling Finance Function.</p>
	Advance Financial Accounting	<p>CO 1 This subject helps to student develops advance accounting skills among them.</p> <p>CO 2 this subject helps to student to make a decision on Investment, Valuation of Goodwill, Valuation of Shares and Bank Accounts etc.</p> <p>CO 3 The students will become skillful account and finance manager so he can able to make any kind of decision making.</p>

	Research Methodology	<p>CO 1 The students will become scientific researcher so it will help them to make a comparison and decision making.</p> <p>CO 2 The students will be able to carry research and survey in area of marketing, HR, Production, account and finance.</p>
	Marketing Management	<p>CO 1 The students will become successful marketer by studying management theories.</p> <p>CO 2 The students will be able to carry research and survey in area of marketing, advertising and sales.</p> <p>CO 3 The students will become Successful Marketing Manager after compilation of this course.</p>
	Advanced Financial Management	<p>CO 1 It will be help the students to enable and equip the students with the advanced functions and tools of financial management.</p> <p>CO 2 The students will become Successful Financial Manager.</p>
	Accounting and Finance	<p>CO 1 It is helpful to make the students to understand the recent trends in accounting and finance.</p> <p>CO 2 It is helpful to understand the requirements of a career in accounting and finance.</p> <p>CO 3 It is helpful to make the students aware of working of money and capital markets and their regulatory authorities.</p>
	Marketing Management	<p>CO 1 It is helpful to understand the opportunities and challenges in rural marketing.</p> <p>CO 2 It is helpful to understand the differences between Rural and Agricultural marketing.</p> <p>CO 3 It is helpful to evaluate different marketing strategies used in rural distribution and promotion.</p>
	Financial Markets	<p>CO 1 This course is designed to help the students in understanding of financial market.</p> <p>CO 2 This course is designed to help the students in understanding the concepts of equity.</p> <p>CO 3 Students will also learn the process involved in trading, clearing, settlement and risk management of equity derivatives.</p>

Course Outcomes of the Faculty of Science and Technology

Name of the Course	Paper	Course Outcomes
B.C.A I	Fundamentals of Computer Science and Information Technology	<p>CO 1 To learn basic function of devices like I/O, HDD etc.</p> <p>CO 2 To Understand the Fundamental of Software and Hardware.</p> <p>CO 3 Understand the Concept of Operating System and Network.</p>
	Office Automation	<p>CO 1 Demonstrate oral communications skills such as presentation for an audience, discussions, and debates.</p> <p>CO 2 Demonstrate writing abilities such as: reports, instructions, and documentation.</p> <p>CO 3 Exhibits good listening skills when others are speaking, keeping notes, journals.</p>
	Programming in C	<p>CO 1 Learn how to build by the algorithms for problems.</p> <p>CO 2 Learn how to create pictorial representations of the program.</p> <p>CO 3 Learn how to apply logic for problems.</p> <p>CO 4 Enhance their programming skills.</p>
	Elective: Element of Statistics	<p>CO 1 Have the versatility to work effectively in a broad range analytic, scientific, government and other position.</p> <p>CO 2 Recognize & appreciate the connection between theory and application.</p> <p>CO 3 Be lifelong learners who are able to independently expand their statistical expertise when needed.</p>
	Open Elective: Business Communication	<p>CO 1 Understand and demonstrate Basic English usages for their different purposes.</p> <p>CO 2 Clear entrance examination and aptitude tests.</p> <p>CO 3 Write various letters, reports required for professional life.</p>
	Business Accounting With Tally (BCA-201)	<p>CO 1 Develop and understand the nature and purpose of financial statements in relationship to decision making.</p> <p>CO 2 Develop the ability to use the fundamental accounting equation to analyse the effect of business transactions on an organization's accounting records and financial statements</p> <p>CO 3 Develop the ability to use accounting information to solve a variety of business</p>

		problems.
	Organizational Behaviour	<p>CO 1 Identify personal dimensions of personality, Job satisfaction, motivation and learning.</p> <p>CO 2 Evaluate the developments of basic conflict resolutions.</p> <p>CO 3 Discuss the main problems about stress, power and politics and ethics.</p>
	Web Technology	<p>CO 1 Understand the enabling technologies for building Internet and Web database applications.</p> <p>CO 2 Students are able to develop a dynamic webpage by the use of java script and DHTML.</p> <p>CO 3 Apply the techniques and features of the client/server development languages to construct a database application based on Internet.</p>
	Elective : Desktop Publishing (DTP)	<p>CO 1 Identify desktop publishing terminology and concepts.</p> <p>CO 2 Manipulate text and graphics to create a balanced and focused layout.</p> <p>CO 3 Create fliers, brochures, and multiple page documents.</p>
	Open Elective: Corporate English	<p>CO 1 Understand how a company and its staff prepare themselves for a move.</p> <p>CO 2 Give a short presentation on a location.</p> <p>CO 3 Understand how a group of people settled in after relocating.</p>
B.C.A II	Logical Reasoning	<p>CO 1 Distinguish the basic elements of arguments and recognize the different types of arguments.</p> <p>CO 2 Identify logical relations among statements; and Analyse logically complex statements into their truth- functional or quantificational components.</p> <p>CO 3 Distinguish valid deductive arguments from invalid ones.</p>
	Object Oriented Programming using C++	<p>CO 1 Apply C++ features to program design and implementation.</p> <p>CO 2 Explain object-oriented concepts and describe how they are supported by C++ including.</p> <p>CO 3 Identifying the features and peculiarities of the C++ programming language.</p>

	<p>Data Structure</p>	<p>CO 1 Have a comprehensive knowledge of the data structures and algorithms on which file structures and data bases are based.</p> <p>CO 2 Understand the importance of data and be able to identify the data requirements for an application.</p> <p>CO 3 Understand the issues involved in algorithm complexity and performance.</p>
	<p>Elective : E-Commerce Technologies & Cyber Security</p>	<p>CO 1 Understand the basic concepts and technologies used in the field of management information systems.</p> <p>CO 2 Have the knowledge of the different types of management information systems.</p> <p>CO 3 Understand the processes of developing and implementing information systems.</p> <p>CO 4 Be aware of the ethical, social, and security issues of information systems.</p>
	<p>SEC: Web Development and PHP Programming</p>	<p>CO 1 Write PHP script to handle HTML forms.</p> <p>CO 2 Analyse and solve common web application tasks by writing PHP programme.</p> <p>CO 3 Analyse and solve various database tasks using PHP language.</p>
	<p>Numerical Aptitude</p>	<p>CO 1 To assess whether different levels of problem solving ability have any impact on the Mathematical Aptitude.</p> <p>CO 2 To find out whether the type of school have any impact on the Mathematical Aptitude.</p> <p>CO 3 To find out the relationship of Mathematical Aptitude with the variables like Intellectual and Problem Solving Abilities.</p>
	<p>Java Programming</p>	<p>CO 1 Understand the concept of OOP as well as the purpose and usage principles of inheritance, polymorphism, encapsulation and method overloading.</p> <p>CO 2 Identify classes, objects, members of a class and the relationships among them needed for a specific problem.</p> <p>CO 3 Develop programs using the Java Collection API as well as the Java standard class library.</p>

	Relational Database Management System	<p>CO 1 Master the basic concepts and appreciate the applications of database systems.</p> <p>CO 2 Be familiar with a commercial relational database system (Oracle) by writing SQL using the system.</p> <p>CO 3 Be familiar with basic database storage structures and access techniques: file and page organizations, indexing methods including B-tree, and hashing.</p>
	Operating System	<p>CO 1 Gain extensive knowledge on principles and modules of operating systems.</p> <p>CO 2 Understand key mechanisms in design of operating systems modules.</p> <p>CO 3 Understand process management, concurrent processes and threads, memory management, virtual memory concepts, deadlocks.</p>
	Elective: Computer Graphics	<p>CO 1 Understand the real graphics programming.</p> <p>CO 2 Understand the API OpenGL</p> <p>CO 3 Understand the mathematics basics, mainly linear algebra and implemented by OpenGL and programming language like C.</p>
	SEC: System Administration and Maintenance	<p>CO 1 Use multiple computer system platforms, and understand the advantages of each.</p> <p>CO 2 Protect and secure users' information on computer systems.</p>
B.C.A III	Windows Programming with C#.NET	<p>CO 1 Demonstrate fundamental knowledge and understanding of the general structure of C# programming language.</p> <p>CO 2 Develop software in C#.</p> <p>CO 3 Evaluate user requirement for software functionality required to decide whether the programming language C# can meet user requirement.</p>
	Advance Java	<p>CO 1 To understand the windows programming with AWT & Applet.</p> <p>CO 2 To gain understanding of windows & web based programming.</p> <p>CO 3 To impart the knowledge on basic concept of multithreading programming.</p>

	<p>Linux and Shell Programming</p>	<p>CO 1 Awareness of existing demanding trends in IT industry in order to get placement and research in open source market. CO 2 Understand the Linux O.S. architecture. CO 3 Install and use different types of distribution available.</p>
	<p>Project</p>	<p>CO 1 The aim of the Project work is to acquire practical knowledge on the implementation of the programming concepts studied. CO 2 develop plans with relevant people to achieve the project's goals CO 3 Estimate and cost the human and physical resources required, and make plans to obtain the necessary resources.</p>
	<p>Elective: Digital Image Processing</p>	<p>CO 1 Review the fundamental concepts of a digital image processing system. CO 2 Analyse images in the frequency domain using various transforms. CO 3 Evaluate the techniques for image enhancement and image restoration.</p>
	<p>SEC: MySQL</p>	<p>CO 1 Detailed understanding of MYSQL database. CO 2 Knowledge of writing SQL queries. CO 3 Knowledge of maintaining relation between table and database normalization.</p>
	<p>Adv. Networking Concept</p>	<p>CO 1 To master the terminology and concepts of the OSI reference model and the TCP-IP reference mode. CO 2 To be familiar with wireless networking concepts. CO 3 To be familiar with contemporary issues in networking technologies.</p>

	<p>Software Engineering</p>	<p>CO 1 An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics</p> <p>CO 2 An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factor.</p> <p>CO 3 An ability to work professionally in both thermal and mechanical systems areas.</p>
	<p>Linux Administration</p>	<p>CO 1 Make appropriate decisions during the configuration process to create a properly functioning Linux environment.</p> <p>CO 2 Analyse the need for security measures for a Linux environment.</p> <p>CO 3 Identify the different uses and advantages of Linux in a business environment in order to participate in discussions regarding network servers and services.</p>
	<p>Software Testing</p>	<p>CO 1 Various test processes and continuous quality improvement</p> <p>CO 2 Input space modelling using combinatorial designs</p> <p>CO 3 Application of software testing techniques in commercial environments</p>
	<p>Elective: Mobile Communication</p>	<p>CO 1 To make students familiar with various generations of mobile communications.</p> <p>CO 2 To understand the concept of cellular communication.</p> <p>CO 3 Knowledge of GSM mobile communication standard, its architecture, logical channels, advantages and limitations.</p>
	<p>SEC: Android Programming</p>	<p>CO 1 Demonstrate and utilize necessary technical knowledge and skills both in breadth and depth, to pursue the practice or advanced study of computer science.</p> <p>CO 2 Understand the importance of life-long learning, and be prepared to learn and understand new technological developments in their field.</p>

		<p>CO 3 Demonstrate some of the methods used to secure data and communications.</p>
<p>M.SC CS I</p>	<p>Computer Architecture and Microprocessor</p>	<p>CO 1 Describe the architecture and organization of microprocessor along with instruction set format.</p> <p>CO 2 Describe modes and functional block diagram of 8086 along with pins and their functions.</p> <p>CO 3 Develop assembly language programs using various programming tools. Visit for more Learning Resources.</p>
	<p>OOP concepts using C++</p>	<p>CO 1 Apply C++ features to program design and implementation.</p> <p>CO 2 Explain object-oriented concepts and describe how they are supported by C++ including.</p> <p>CO 3 Identifying the features and peculiarities of the C++ programming language.</p>
	<p>Mathematical Foundation for Computer Science</p>	<p>CO 1 Ability to apply mathematical logic to solve problems.</p> <p>CO 2 Understand sets, relations, functions and discrete structures.</p> <p>CO 3 Able to use logical notations to define and reason about fundamental mathematical concepts such as sets relations and functions.</p>
	<p>Elective: Computer Network</p>	<p>CO 1 Learn the need to create a Network.</p> <p>CO 2 Learn about different layers and protocols present in those layers.</p> <p>CO 3 Learn to configure the network devices.</p> <p>CO 4 Learn about IP -Addressing.</p>
	<p>Open Elective: Introduction to E-commerce</p>	<p>CO 1 Understand the basic concepts and technologies used in the field of management information systems.</p> <p>CO 2 Have the knowledge of the different types of management information systems.</p> <p>CO 3 Understand the processes of developing and implementing information systems.</p>

	<p>Design and Analysis of Algorithms</p>	<p>CO 1 Ability to analyse the performance of algorithms.</p> <p>CO 2 Ability to choose appropriate algorithm design techniques for solving problems</p> <p>CO 3 Ability to understand how the choice of data structures and the algorithm design methods impact the performance of programs</p>
	<p>Software Engineering</p>	<p>CO 1 Ability to identify the minimum requirements for the development of application.</p> <p>CO 2 Ability to develop, maintain, efficient, reliable and cost effective software solutions.</p> <p>CO 3 Ability to critically thinking and evaluate assumptions and arguments.</p>
	<p>Programming with VB.NET</p>	<p>CO 1 Analyse program requirements.</p> <p>CO 2 Design/develop programs with GUI interfaces.</p> <p>CO 3 Code programs and develop interface using Visual Basic .Net.</p> <p>CO 4 Perform tests, resolve defects and revise existing code.</p>
	<p>Elective Compiler Designing</p>	<p>CO 1 To realize basics of compiler design and apply for real time applications.</p> <p>CO 2 To introduce different translation languages.</p> <p>CO 3 To understand the importance of code optimization.</p> <p>CO 4 To know about compiler generation tools and techniques.</p>
	<p>Open Elective: Information Technology</p>	<p>CO 1 Be able to analyse a problem, and identify and define the computing requirements appropriate to its solution.</p> <p>CO 2 Be able to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.</p> <p>CO 3 Understand professional, ethical, legal, security and social issues and responsibilities.</p> <p>CO 4 Be able to analyse the local and global impact of computing on individuals,</p>

		organizations, and society.
M.SC CS II	Advance Database Administration	<p>CO 1 Master the basic concepts and appreciate the applications of database systems.</p> <p>CO 2 Be familiar with a commercial relational database system (Oracle) by writing SQL using the system.</p> <p>CO 3 Be familiar with the basic issues of transaction processing and concurrency control.</p>
	Java Server Pages, Servlets & Struts	<p>CO 1 Create dynamic web pages, using Servlets and JSP.</p> <p>CO 2 Make a reusable software component, using Java Bean.</p> <p>CO 3 Learn to access database through Java programs, using Java Data Base Connectivity (JDBC).</p>
	Data Mining and Data Warehousing	<p>CO 1 Store voluminous data for online processing.</p> <p>CO 2 Pre-process the data for mining applications.</p> <p>CO 3 Apply the association rules for mining the data.</p> <p>CO 4 Design and deploy appropriate classification techniques.</p>
	Digital image processing using MATLAB	<p>CO 1 Review the fundamental concepts of a digital image processing system.</p> <p>CO 2 Analyse images in the frequency domain using various transforms.</p> <p>CO 3 Evaluate the techniques for image enhancement and image restoration.</p>
	Elective-III Mobile Programming	<p>CO 1 Writes code for interacting with Android content providers.</p> <p>CO 2 Uses mark-up to specify Android security permissions.</p> <p>CO 3 Understands and uses the location based applications, including GPS sensors and Maps API.</p>

	<p>Fuzzy System and ANN</p>	<p>CO 1 Understand the concept of fuzziness involved in various systems and fuzzy set theory..</p> <p>CO 2 Comprehend the fuzzy logic control and adaptive fuzzy logic and to design the fuzzy control using genetic algorithm.</p> <p>CO 3 Comprehend the concepts of feed forward neural networks.</p>
	<p>Linux Administration</p>	<p>CO 1 Make appropriate decisions during the configuration process to create a properly functioning Linux environment.</p> <p>CO 2 Analyse the need for security measures for a Linux environment.</p> <p>CO 3 Identify the different uses and advantages of Linux in a business environment in order to participate in discussions regarding network servers and services.</p>
	<p>Elective : Embedded System Design through C& C++</p>	<p>CO 1 How to use C and its descendent C++ in any embedded system.</p> <p>CO 2 How to establish embedded software.</p> <p>CO 3 Apply the Embedded rules for Programmes.</p> <p>CO 4 Design and deploy appropriate Embedded Device.</p>
	<p>Cloud Computing</p>	<p>CO 1 Articulate the main concepts, key technologies, strengths, and limitations of cloud computing.</p> <p>CO 2 Identify the architecture and infrastructure of cloud computing, including SaaS, PaaS, IaaS, public cloud, private cloud, hybrid cloud, etc.</p> <p>CO 3 Provide the appropriate cloud computing solutions and recommendations according to the applications used.</p>

B.Voc. Fashion Technology I	Basic Pattern Making (Th)	CO 1 Learner will get basic knowledge about drafting of different types of sleeves, collars & how to draft a pattern for their garment designs like skirts, frocks etc
	Apparel Construction (pr)	CO 1 Students will learn how to cut & stitch basic dresses like skirts frocks necklines according to drafting.
	Fashion Art & Illustration (Pr)	CO 1 Students will learn how to draw mechanical croqui, eyes, hands, legs, nose, ears & also basic garment drawing. CO 2 It will help to students as designing purpose.
	Elements of textile (Th) Textile weaving (Th)	CO 1 This is textile related theory subject. Students will get knowledge about natural fibers, manmade fibers, yarns & weaving process. CO 2 Students will get job opportunity in textile industry.
	Surface Ornamentation (Pr)	CO 1 Students will learn different stitches of embroidery CO 2 It will help to make handmade embroidery in costumes .
	Fashion Development (Th)	CO 1 Learner will understand what fashion cycle is & how fashion has been developed & changed by times and in day to day life.
	Language & Communication skill	CO 1 This subject is very helpful to enhance the students communication, learning, reading & writing skill. CO 2 It will help to develop the students personality.
	Yoga and Stress Management	CO 1 Basic knowledge about yoga asana, pranayam, kriyas & stress relaxation. CO 2 The benefits of yoga, recognizing that relaxed worked are healthier and more creative.
	Accessories Making (Pr) Craft Making (Pr)	CO 1 It includes the items such as jewellery, belts, handbags, hats to complete the perfect outfit. CO 2 Students will do specialization in accessory making. They will become accessory designer.

	Elements & Principle of Design	CO 1 To improve their designing level by using elements & principle of design. Students will learn what elements & principle of designs are?
B.Voc. Fashion Technology II	Advance Pattern Making (Th)	CO 1 Pattern making is necessary for fashion designers to enable them to make different garments according to their designs such as kurties variations, women's shirt & trousers, different types of one piece dresses.
	Apparel Construction (Pr)	CO 1 Students get the knowledge about how to stitch different designs of garments which has been already done in pattern making. CO 2 Students can make career as production manager in clothing company.
	History of Indian Costume (Pr) Costume History of world (Th)	CO 1 Students get information about traditional costumes & culture of different states of India & also different countries. CO 2 Students can get job as a costume designer in film industry.
	Banking & Export (Th)	CO 1 This subject is helpful to students for banking knowledge such as types of bank account, export production, export documentation etc. CO 2 This will help for entrepreneurs & everyone.
	Basics of Computer (Pr) Computer Application (Pr)	CO 1 It includes MS Office & information about internet explorer & Photoshop. CO 2 Its useful for designers. Entrepreneurs for make their documentation. CO 3 Students can get job in clothing company as a designer.
	Home Textile & Fabric Manipulation (Pr)	CO 1 This is very interesting subject and helps to enhance students creativity. CO 2 Includes types of smoking effects on the fabric, pillow & cushion cover making, curtains making, dying & printing. CO 3 Opportunity to get job in home furnishing textile industry.

	<p>Designing According To Consumer Demand (Pr)</p>	<p>CO 1 Fashion designers create women’s, men’s and children’s apparel. This might include sportswear, outerwear, formalwear, Innerwear etc.</p> <p>CO 2 Students will get knowledge about how to design dresses according to consumer’s body shape, height, weight, skin complex by using right color, texture, prints etc.</p> <p>CO 3 Students will get job as designer or they can start their own business.</p>
<p>B.Voc. Fashion Technology</p> <p>III</p>	<p>Advance Pattern Making (Th)</p>	<p>CO 1 Pattern is a template of any design which trace on the fabric and cutting has been done. 3rd year class students makes men’s shirt, trouser jacket & make patterns of dresses which designed by them.</p>
	<p>Advance Apparel Construction (Pr)</p>	<p>CO 1 Students will understand how to get stitched the patterns of designs made by them.</p>
	<p>Portfolio Development (Pr)</p>	<p>CO 1 This is very important subject in fashion technology. In this subject students learn what is research? How research can be done for any theme & how to design & stitch the garments according to research for fashion show.</p> <p>CO 2 After 3 years degree course students will become designers.</p>
	<p>Seam Finishes & Hem Finishes (Pr)</p>	<p>CO 1 Students should know how to finish the garment stitching in proper way so, they can learn these things in this subject to increase their finishing in dresses.</p>
